

TECH PROFILE

deister software

Product Portfolio

Deister's portfolio delivers value through enterprise software solutions, mobile apps, and large-scale, database-centric application development tools for programmers. Some of our most popular include:

Business Solutions

Axional ERP

Product suite with modules by business area.

- Finance/Accounting
- Sales/Distribution
- Fixed Assets
- Production Planning
- Maintenance
- Project Management
- Customer Service
- Salesforce

Industry Modules

- Retail
- Healthcare
- Maintenance
- Transportation
- Construction/Engineering

Mobile Solutions

Android OS Core

Rapid app deployment through SOAP services.

- Complex query forms
- Online and offline modes
- Geospatial analysis
- Operational reporting
- Portal and dashboards
- Location tracking
- Secure user access

Applications

- Point of Sale
- Customer Relationships
- Warehouse Management
- Pickup and Delivery
- Maintenance Management

Development Tools

Java J2EE Platform

Build database-centric, cloud-based applications.

- Web, SOA, and mobile architecture integrated
- Multitenant architecture
- Informix, Oracle, DB2, Postgres native support
- XML programming for database and Java interaction

Dev Products

- Axional Studio
- Axional Reports
- Axional Geospatial
- Axional Portal
- Axional OS

Organizational Knowledge

Deister's portfolio delivers value through enterprise software solutions, mobile apps, and large-scale, database-centric application development tools for programmers. Some of our most popular include:

Architecture

- High-end storage systems (Symmetrix, Clarion, EMC, Storagetek or IBM)
- Common transport protocols from TCP/IP to HTTP
- Service-oriented architecture

Application Design

- Java/C++ object-oriented programming
- Large-scale J2EE development
- Development of XML languages for database and Java interaction
- XSLT and FOP

Databases

- Planning database capacity and layout
- Performance tuning
- Data backup and replication
- SQL, stored procedures, triggers
- Cross-database knowledge (Informix, Oracle, DB2, Postgres)

Mobile Development

- Rich graphics and UI
- Experience with complex mobile business applications

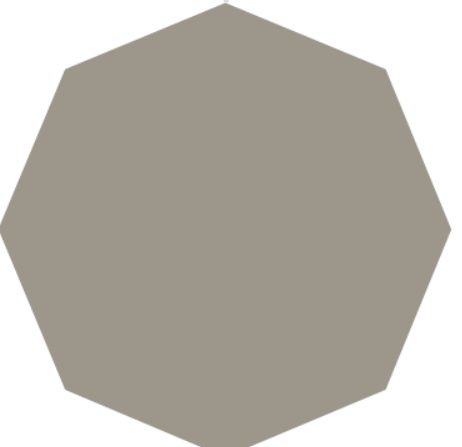

Web Development

- Broad experience in UI design
- Web-related languages from JavaScript to DOM
- JQuery, AJAX, and ExtJS libraries

Geospatial Info

- Object relational database extensions for GIS metadata processing
 - Geographic ETL
 - High-end analysis and visualization tools
- 

Services

**Updating and Modernizing
Legacy Resources**

**Development of Custom, Company-Specific
Software Solutions**

Database Migration
